

STAHL+BAND

METALS

Stahl and Band uses a variety of metals. These include Steel, Brass, Stainless Steel. Each of these Materials are finished based on the properties of the metals.

Our Brass has a *live finish* this means it has been unfished and will undergo natural patination over time. We celebrate the beauty of this and allow the finish to change with its environment. We also will patinate the brass to give it an antiqued or blackened finish.

Our Steel and Stainless steel is always finished with a Matte clear coat to prevent corrosion. These also have the ability to be powder coated. RAL number is to be provided to match the color.
