List Price *	Upon Request

* List pricing is subject to change and does not include shipping

Care Instructions	<p><i>Hand Brushed Brass is a delicate matte finish which softens the natural tone of the underlying brass. Clear sealing will protect and retain the original finish with minimal cleaning, while waxing will allow the surface to continue to age and darken organically over time, particularly where handled.</i></p> <p><i>Aged Brass has the warm, natural tone of lightly patinated brass. Clear sealing will protect and retain the original finish with minimal cleaning, while waxing will allow the surface to continue to age and darken organically over time, particularly where handled.</i></p> <p><i>Bronzed Brass is a hand-patinated dark bronze finish with depth and minor tonal variation. Clear sealing will protect and retain the original finish with minimal cleaning, while waxing will allow the surface to continue to age and darken organically over time, particularly where handled.</i></p> <p><i>Polished Brass is a mirrored finish that is left completely unsealed to age naturally over time. The surface will become matte and varied as it oxidises. Fingerprints and marks will be visible, but the unsealed surface is able to be rejuvenated with a soft cloth and brass cleaner.</i></p> <p><i>Hand Brushed Nickel is a soft, silver finish. The metal surface is hand rubbed to reduce sheen and accentuate the warm nickel tones. The finish is left unsealed but will retain its appearance with minimal cleaning.</i></p>
