## *Installation Instructions*

### Step 1

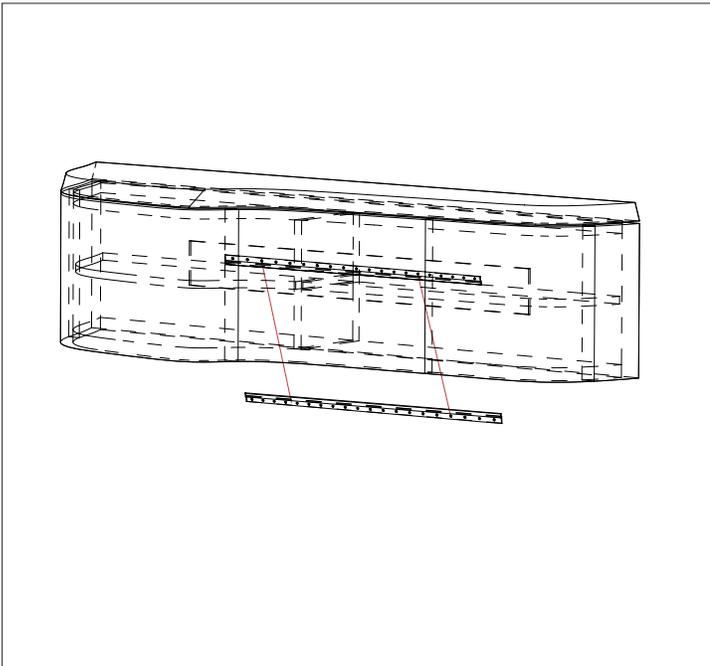

Identify the placement of the wall mount. Measure distance from top of console to top of cleat. Mark locations on wall to ensure the correct location is achieved. Once marked place cleat on wall and screw in with provided screws.

When Screwing in Cleat ensure that it is level and has made contact with at least two studs.

Additional holes will need anchors to ensure a secure mount.

\*Consult contractor if you are not comfortable with this installation to ensure a proper installation

### Step 2

Once cleat is installed on the wall. Wall mount can be installed on the cleat.

Two or three people will be needed for installation. Lift wall mount ensuring that the cleat on the wall mount is aligned with the cleat on the wall.

Place wall mount directly on the wall and lower till two cleats engage. Ensure it is centered on the cleat.
