## Care Instructions

- The legs of each Tableaux are removable for transportation. They screw in securely to the tabletop and have a rubber foot for floor protection.
- Do not lift or rotate the table using the legs.
- Do not transport the table on edge or with the tiled surface facing down.
- Ceramic surfaces will vary in colour range, tonal quality, density, and porosity.
- Tableaux is made from high fired stoneware clay bodies. Some surfaces have a glaze finish; others are left unglazed to celebrate the inherent qualities of the clay body they have been made with.
- Unglazed and less glossy surfaces will be more susceptible to marks and staining but all unglazed Tableaux have been treated with a penetrating sealer.
- During transport and installation, we recommend the installer wear disposable gloves to stop grease and dirt transfer.
- Gently wipe the ceramic surface using warm, soapy water and a clean, lint-free, soft cloth wrung dry. Leave to dry before placing the plinth or other objects on the table.
- Stubborn marks on the ceramic surface can be removed with methylated spirits and a clean lint-free, soft cloth. Do not use methylated spirits on the metal table base or legs.
- Do not scrub, use scourers, steel wool, or abrasive soaps and cleaners.
- Do not use high pressure hose cleaning equipment.
- When dusting, lightly wipe with a clean lint-free, soft cloth or other dusting brush.
- Handle powder coated surfaces with care.
