BOULDER DINING TABLE

Specifications

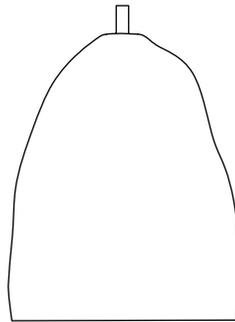

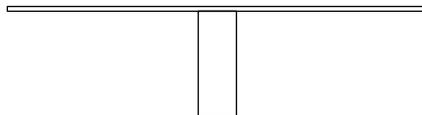

BOULDER DINING TABLE
Components

WOOD TABLE TOP

BOULDERS X3

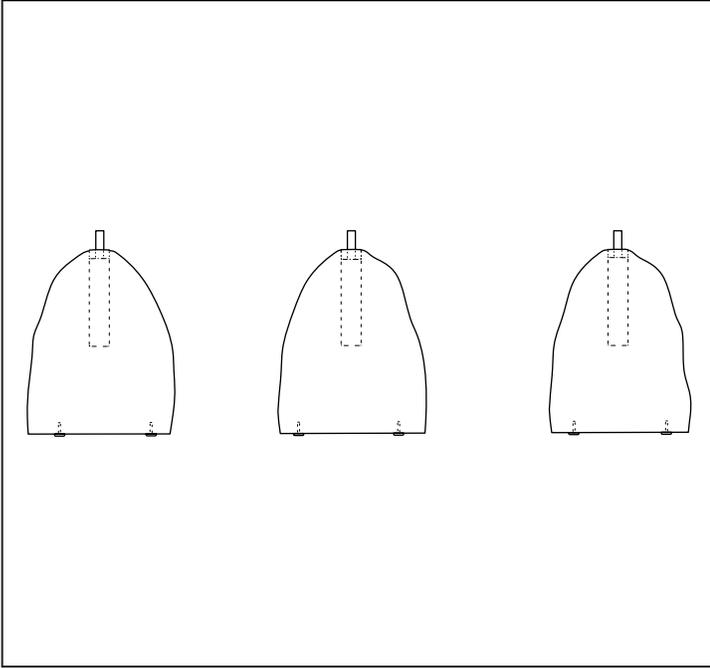

METAL PLATES X3

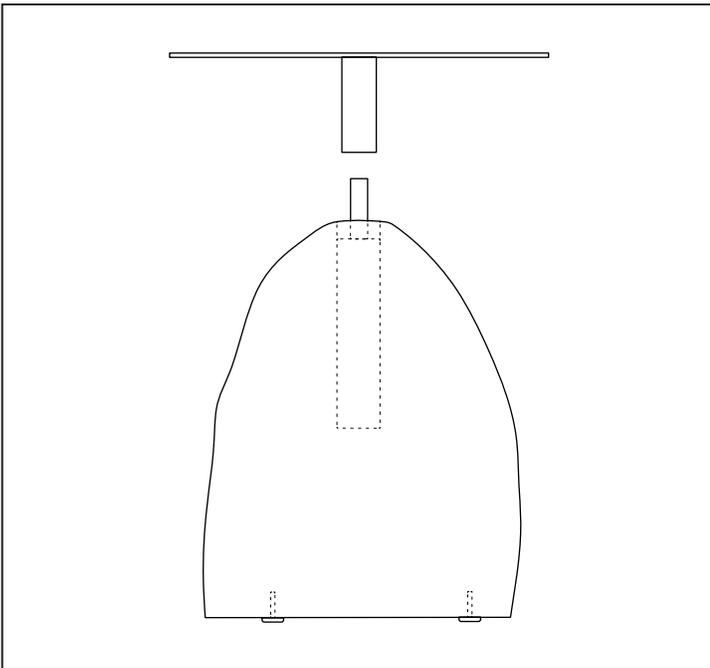

SCREWS

Step 1

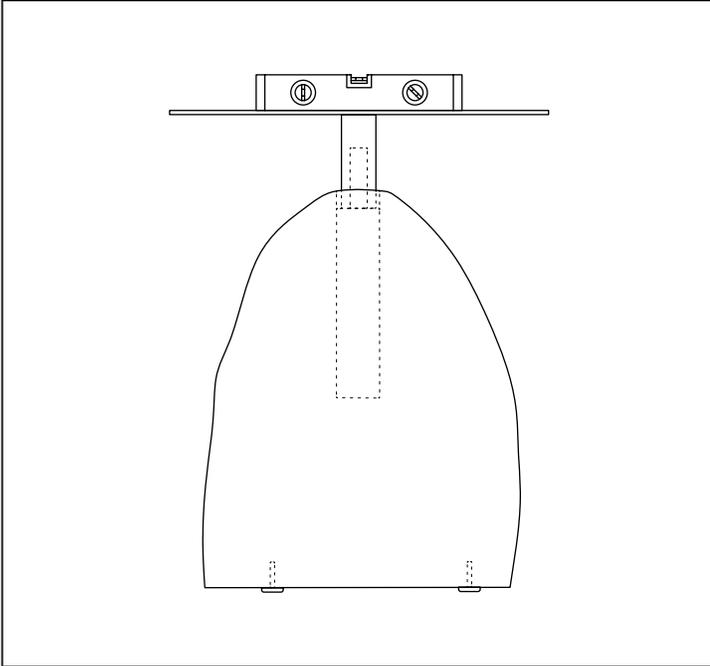

Assembly of this table will require 4-5 people. Place the three boulders in the desired location of the table. Take care and caution while doing so to ensure the placement is correct and boulders are aligned in a straight line.

Step 2

Place metal tops onto boulders.

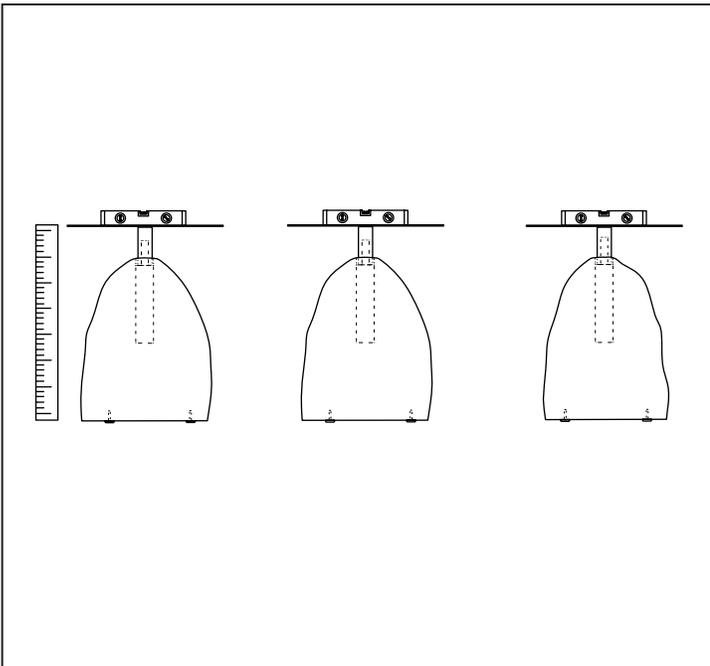

Step 3

Ensure metal top is level on boulder.

*If the plate is not level but is correctly inserted into the boulder, use the levelers at the bottom of the boulder to adjust.

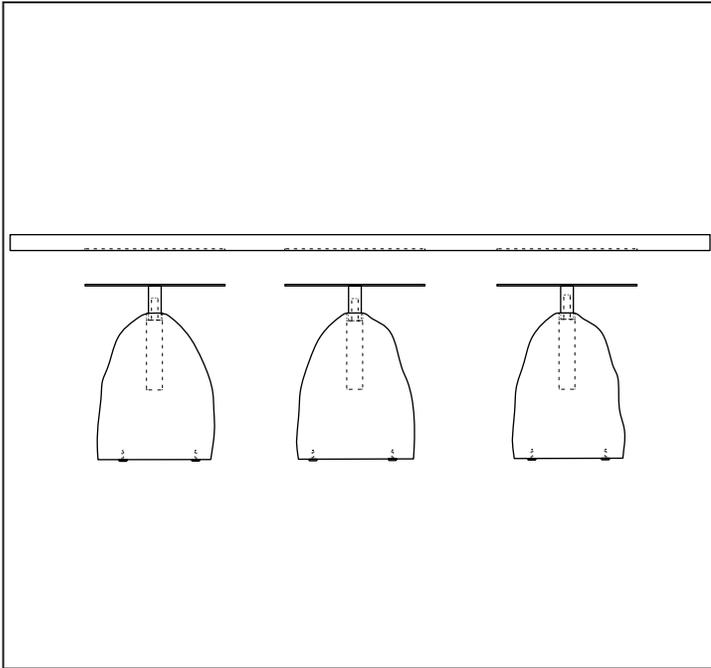

Step 4

Once all 3 boulders have metal plate, ensure each is level and sits at the same height. If not, the table top will not sit correctly.

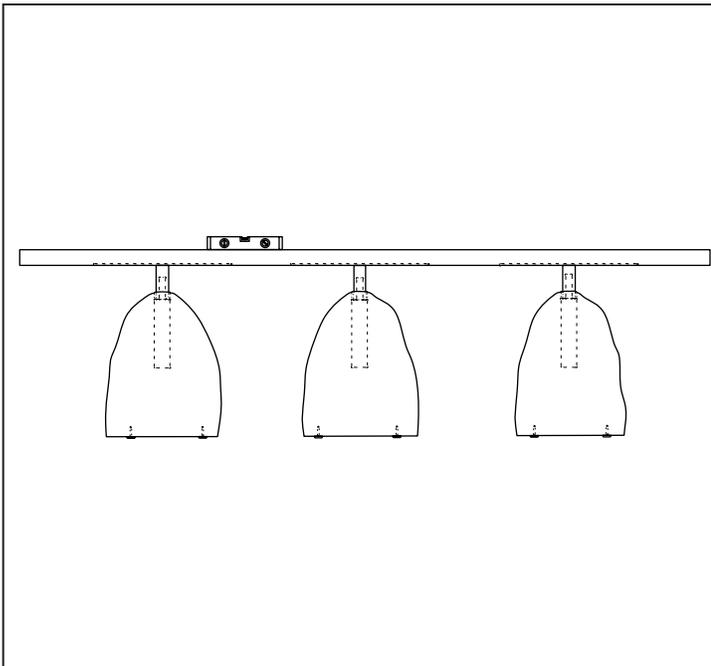

*Use levelers to adjust height and leveling.

Step 5

Once the steel plates are leveled, lift the wood top and fit it onto the steel plates. The plates should fit snug into the notches on the table top.

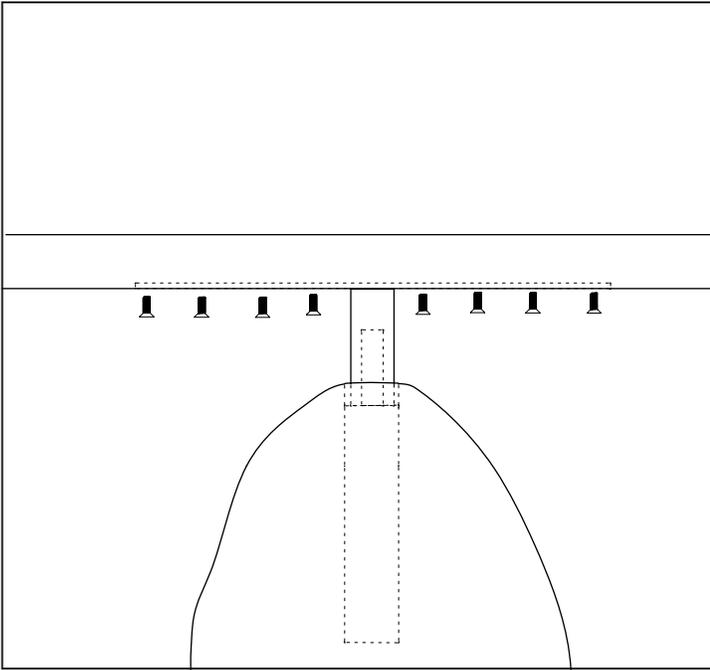

Step 6

Once the table top is placed, make any last minute adjustments to the orientation of the boulders. Ensure the table top is level. Align holes in metal plate with holes in table top.

Step 7

Screw the table top to the steel plates.

Step 8

Assembly complete. Enjoy.
