Care Instructions

Covers are recommended for outdoor pieces during periods of non-use or in harsh climates. They protect against dirt, debris, UV exposure, pollution, and wildlife interaction, helping preserve the material's color and surface over time. Ensure furniture is clean and fully dry before covering.

Cleaning and Maintenance

- *Vacuum Cleaning:* Regularly vacuum both sides of the rug or mat, as well as the floor beneath, to remove dust and debris.
- *Wet Cleaning:* For Silicone Cord—clean regularly with slightly soapy water. Scrub and rinse, then allow the rug to air dry. Wet cleaning removes fine dust particles and restores the rug's natural texture. If a spill occurs, simply rinse with water. Be sure to also clean the floor below, as the spill may penetrate through. For deeper cleaning, use soapy water and a brush or sponge. To remove more stubborn stains/dirt, you can use an eraser sponge (such as the Mr. Clean Magic Eraser), which simply needs a bit of water and a good scrubbing.
