## Specification Drawing

## Care Instructions

### Metal Finish

The metal used for our range oxidise with age and environment, both of which contribute to the evolution of a natural patina. If you favor the original bright finish of your pieces, this is easily restored by use of polishing solution - we recommend Braso or Silvo depending on the metal in question - applied with a soft, clean cloth.

### Stone Finish

To clean stone items, begin by removing any dust with a soft, dry cloth. A cloth dampened with warm water will usually remove superficial marks; if more effort is necessary, add a modest amount of pH-neutral detergent. Finish by wiping each piece thoroughly with a clean, dry cloth to absorb any residual moisture.

## Installation Instructions

See attached document.
