

STAHL+BAND

MATERIAL GUIDE

Stahl and Band sources high quality materials for all of our pieces. We celebrate the beauty of variations in these natural materials. We know that every piece will be unique and true to the natural qualities of these materials.

This document is a visual representation of our finishes. For a true representation of these finishes visit our gallery space to see the combinations of these material and physical samples.

STAHL+BAND

LUMBER

Stahl and Band uses a curated collection of premium domestic wood in our pieces. Wood is a natural material and prone to variation from piece to piece. This includes color, texture as well as minor knots found in the wood. We celebrate these irregularities as a sign of authenticity of the material.

Our wood collection is split into two tiers based on the complexities in the finishing process.

Stahl and Band has the ability to match any finish on our pieces as long as we are given a physical sample

METALS

Stahl and Band uses a variety of metals. These include Steel, Brass, Stainless Steel. Each of these Materials are finished based on the properties of the metals.

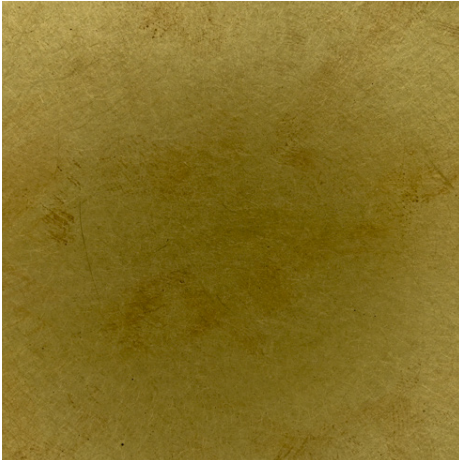

Our Brass has a *live finish* this means it has been unfished and will undergo natural patination over time. We celebrate the beauty of this and allow the finish to change with its environment. We also will patinate the brass to give it an antiqued or blackened finish.

Our Steel and Stainless steel is always finished with a Matte clear coat to prevent corrosion. These also have the ability to be powder coated. RAL number is to be provided to match the color.

MARBLE + STONE + ONYX

Stahl and Band uses a curated collection of Stone, Marble and Onyx. Each stone type has its own unique vaining and properties.

Since stone is a natural material there is expected to be variation of color, texture and pattern in each piece. There can also be slight cracking and chipping in the stone due to the nature of the material. All of our stone pieces have been sealed but with any piece proper and regular maitanence is necesarry.

LEATHER

We use high quality saddle leather in our pieces.

leather is a natural material and will patina and stretch through its use.

Our Natural leather is more prone to change as it is used and will grow more rich in color as it is exposed to sunlight, touch, and moisture.
