Care Instructions

Before cleaning, lighting fixtures must be turned off and unplugged from mains electricity. Whilst cleaning please take care and use the gloves provided.

Metal

The metal used for our range oxidise with age and environment, both of which contribute to the evolution of a natural patina. If you favour the original bright finish of your pieces, this is easily restored by use of polishing solution - we recommend Braso or Silvo depending on the metal in question - applied with a soft, clean cloth. Because each object is cast in small batches, slight variations will occur from one individual piece to another. Production marks may include slight pour ripples or surface pitting, which imprint every item with a unique character.

Stone

Each of our stone objects is unique, due to the variations of colour and veining that effect the inherent aesthetic appeal of natural stone.

To clean stone items, begin by removing any dust with a soft, dry cloth. A cloth dampened with warm water will usually remove superficial marks; if more effort is necessary, add a modest amount of pHneutral detergent. Finish by wiping each piece thoroughly with a clean, dry cloth to absorb any residual moisture.
