Care Instructions

*Never use scouring pads or abrasive cleaning solutions. If it comes in a bottle, its bad for your fixture. Instead, we recommend using soft microfiber cloths, which are gentler on our products and the planet.
Wipe with a damp or dry microfiber cloth. Please note that our brass is unlacquered, and will darken naturally over time.*

Notes

- 1. This fixture can be installed indoor or outdoor.*
- 2. This fixture has two mounting options available: backplate or mud ring*
- 3. The mud ring mounting option creates a trimless installation over a standard junction box. Please note a professional drywall finisher will be required. See installation instructions for details.*
- 4. If planning to install outdoor, consult a professional contractor to ensure a mudring installation is the appropriate application for building material type.*
- 5. If installing fixture outdoor in wet location, install with the shade facing downward, or the shade will collect water. If installing indoor, you can install light fixture with shade facing in the up or down direction.*
