|-------------------|--|
| Care Instructions | Unsealed Finishes |
| | <i>Our brushed and bronzed brass finishes are optionally available without a protective lacquer. These finished will tarnish quickly if touched by bare hands. We recommend leaving these finishes to age and patina naturally, however if desired they can be lightly dusted with a clean, dry microfibre cloth. Never use any liquids when cleaning unsealed surfaces.</i> |
| | <i>Sealed Finishes</i> |
| | <i>Our satin and clear lacquered brass variations, enameled steel, and chrome plated finishes may be dusted with a clean microfibre cloth. If further cleaning is required, gently wipe with a damp microfibre cloth or use a mild glass cleaner, ensuring that no liquids come in to contact with any joints, seams or electrical componentry.</i> |
| | <i>Lamps and Glass Shades</i> |
| | <i>Lamps, glass shades and glass shells may be gently dusted with a dry microfibre cloth. If further cleaning is required, gently wipe with a damp microfibre cloth or use a mild glass cleaner, ensuring that no liquids come in to contact with any unsealed brass finishes.</i> |
