# STAAM CONSOLE

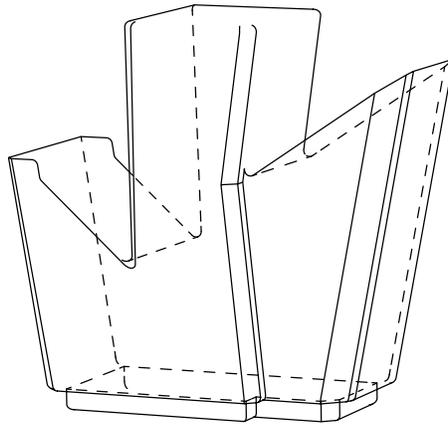

*Specifications*

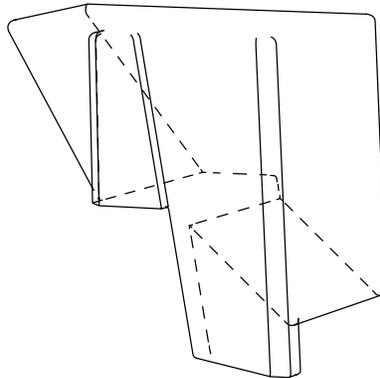

# STAAM CONSOLE

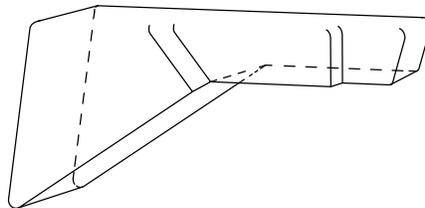

*Components*

CENTER STONE

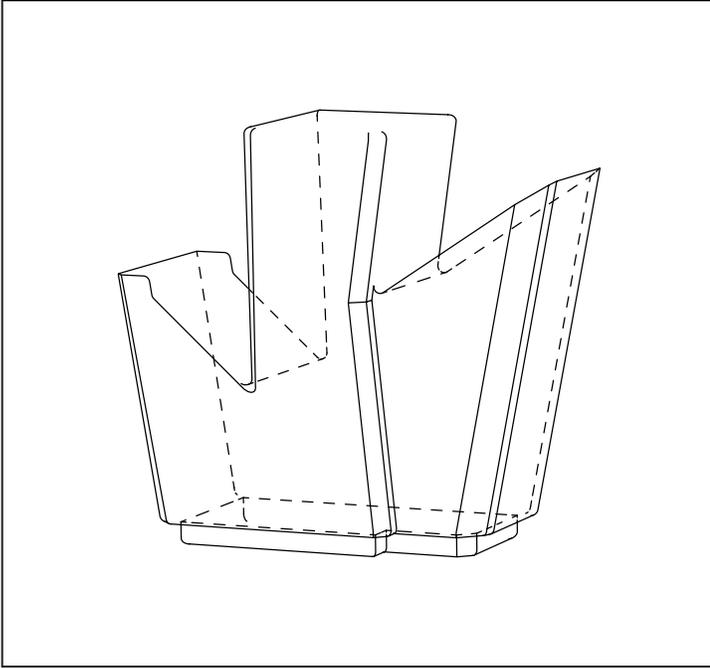

LEFT STONE

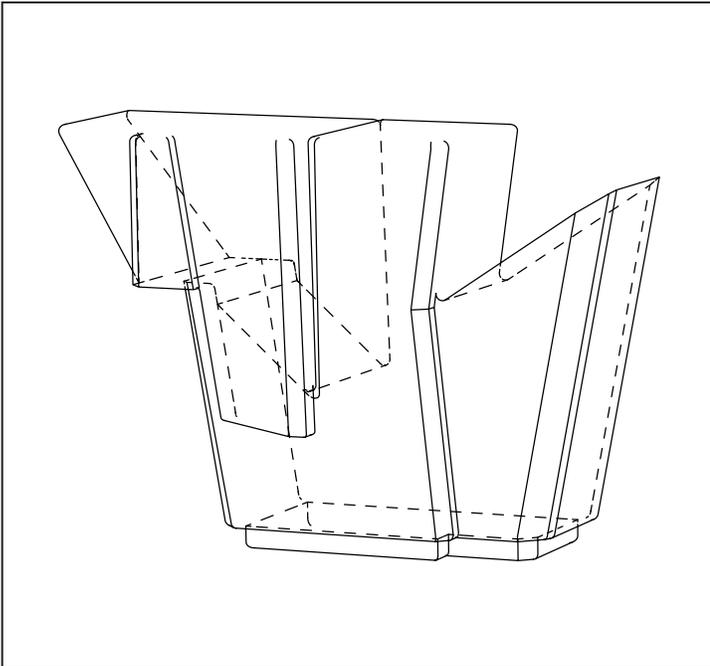

RIGHT STONE

## Step 1

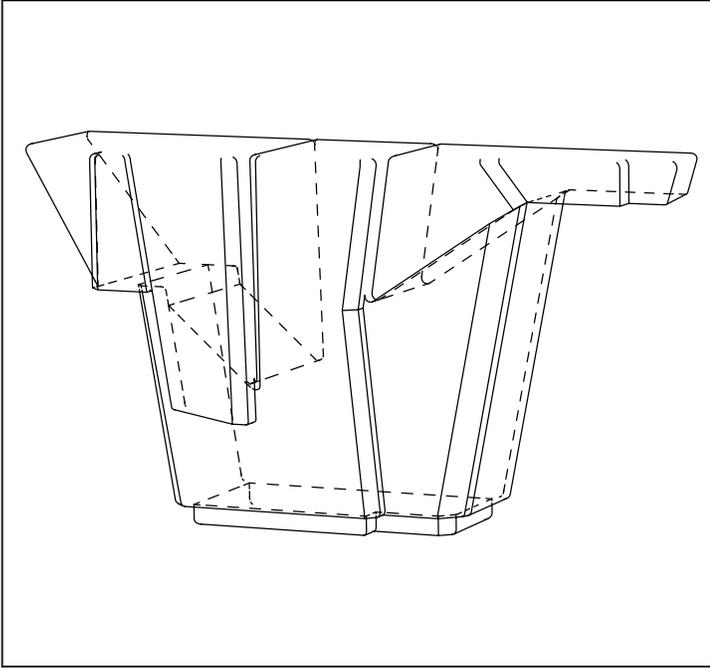

Identify the placement of the console. Ensure center will be placed with adequate spacing on either side to accommodate left and right pieces. Once placement is decided, it requires 3-4 people to move each piece. A dolly is recommended as well.

## Step 2

Once center stone is placed, use 3-4 people to lift the left piece and place it into opening on left side. Front of left piece should sit overlapping the front of the center piece.

## Step 3

Again with 3-4 people, lift the right piece and slot it into place on the center console. Ensure each piece is fitting correctly in center piece.

Assembly complete. Enjoy.
