XL DESK
Components

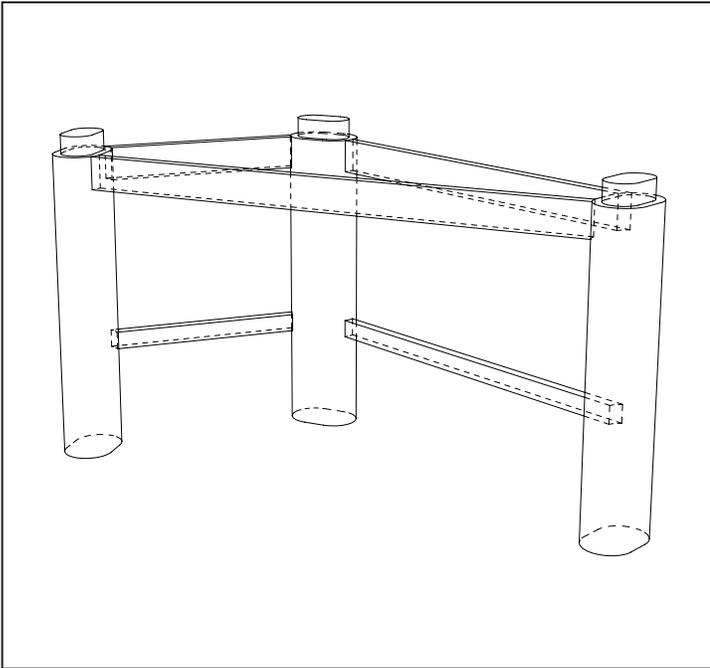

STONE TOP

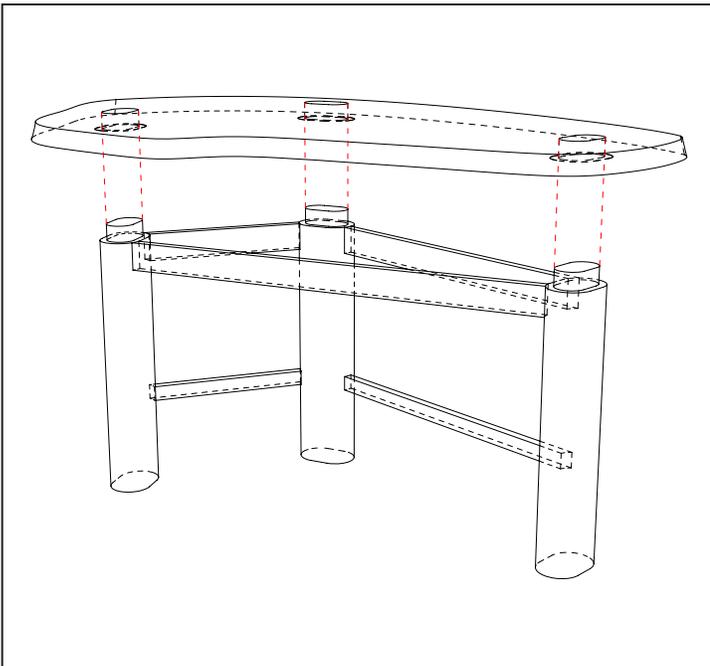

BASE

Step 1

Identify the placement of the desk. Ensure floor is level so the desk is steady. Place the base in the location and orientation the desk should be in, moving it will be difficult once the top is secured.

Step 2

Once desk base is placed in the desired position, you will place the stone top on top of the legs.

Three to four people will be necessary for installation. Lift stone above base and align with the tops of the legs, ensuring they will fit correctly through the holes in the top.

Carefully lower the stone onto the legs, ensure that the top of the legs sits flush with the top of the slab.

Step 3

Assembly complete. Enjoy.
