XL DESK WITH DRAWER

Specifications

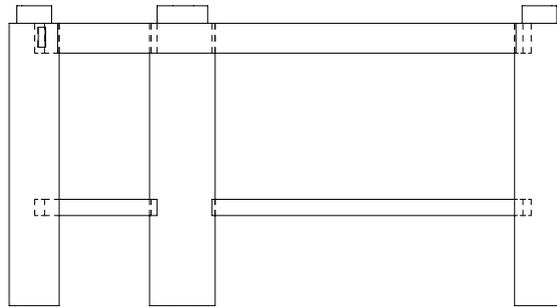

XL DESK WITH DRAWER

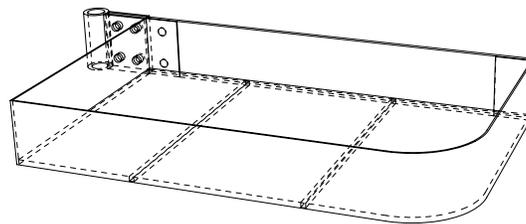

Components

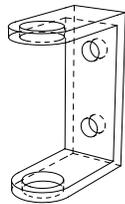

STONE TOP

BASE

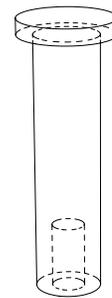

DRAWER

BRACKET

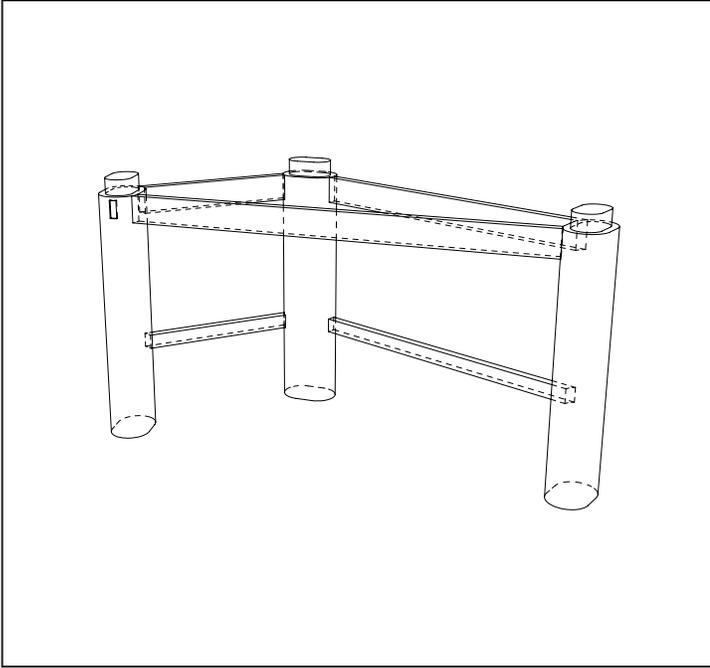

CAP

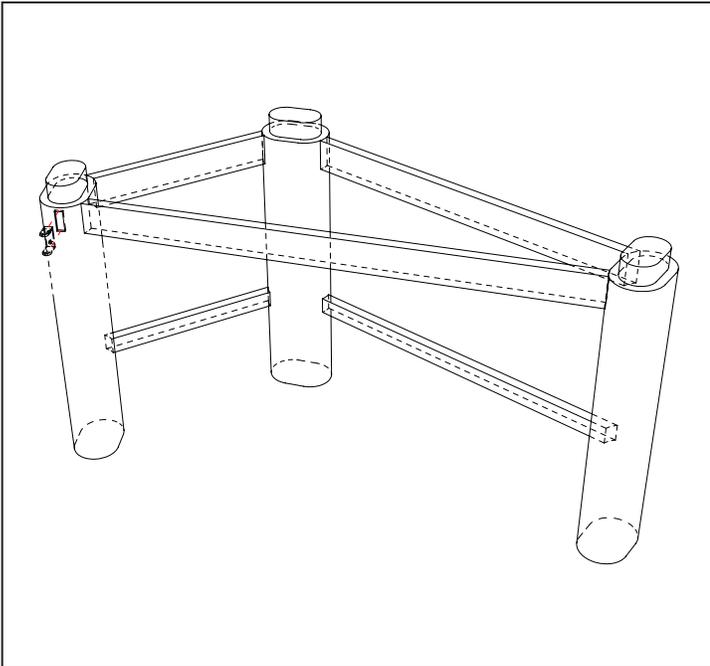

DOWEL

Step 1

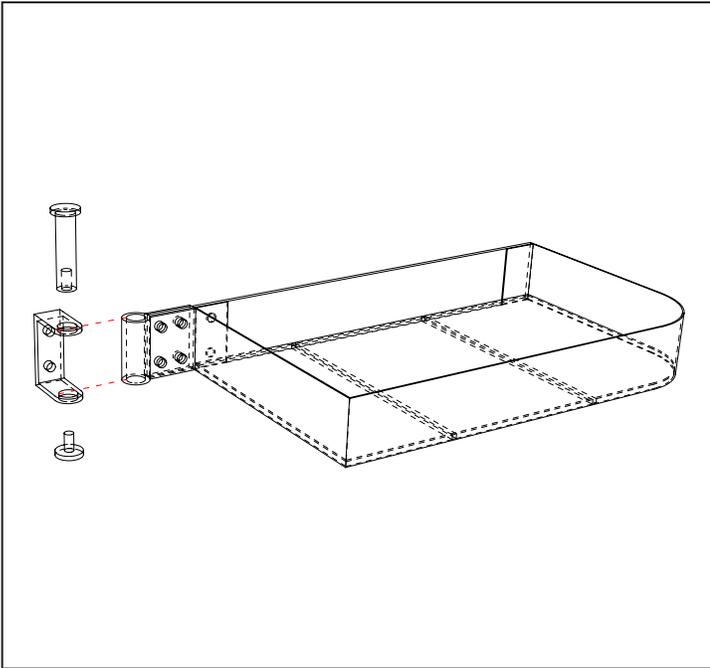

Identify the placement of the desk. Ensure area on floor is level so the desk is steady. Place the base in the location and orientation the desk should be in, moving it will be difficult once the top is secured.

Step 2

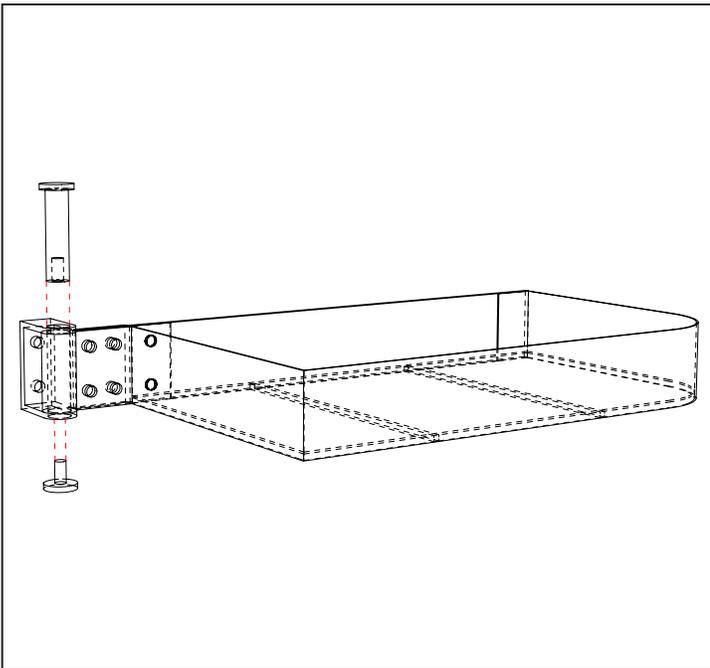

Using the provided screws, attach the bracket to the cutout area in the leg. Ensure bracket is attached securely and fits snugly in the cutout.

Step 3

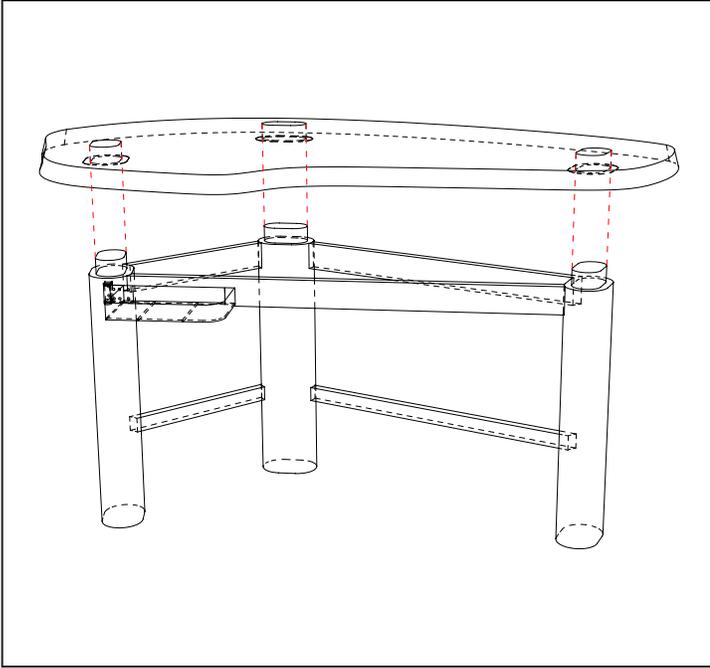

Once the bracket is attached to the leg, slide the hinge component attached to the drawer to that on the leg. The holes will line up.

Step 4

Align drawer. Take the dowel and thread it through the aligned holes, attaching the drawer to the bracket. Place dowel through drawer mounting mechanism. Screw cap onto the bottom of the dowel.

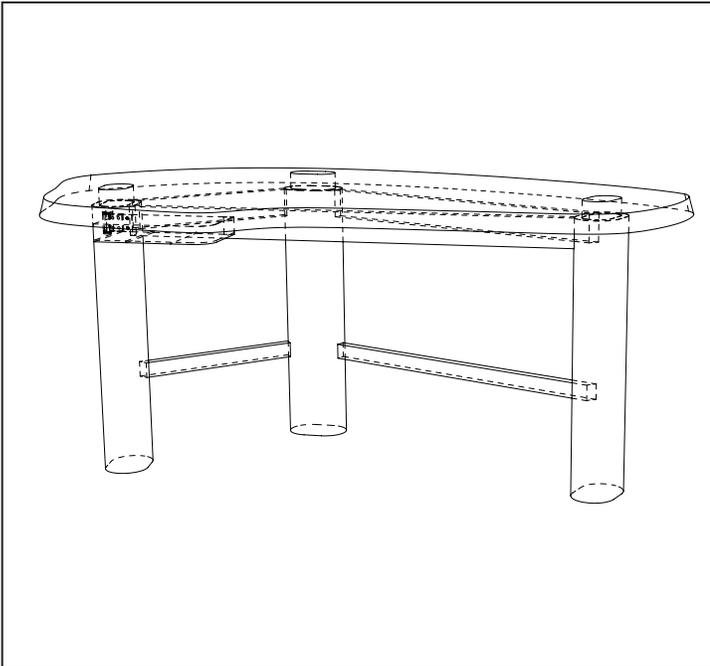

Step 5

Three to four people will be necessary for the final step of installation. Lift the stone above base and align with the tops of the legs, ensuring they will fit correctly through the holes in the slab.

Carefully lower the slab onto the legs, ensure that the top of the legs sits flush with the top of the slab.

Step 6

Assembly complete. Enjoy.
